# BERNSTEIN DISPLAY

Bernstein Display celebrates its 100-year legacy of providing mannequins, forms, fixtures, furniture, textiles and decorative accessories to the visual industry. The focus for 2019 is on authenticity and the fine details inherent in our products. On display is also the beautiful work of our craftspeople.

Our 3,500 square-foot showroom features new products with a focus on what we believe are four trending areas of the retail display industry. Unexpected pairings of materials like metal and cork are the theme of the space. All metals have gone gold in a variety of finishes... from traditional antique brass to the soft and velvety texture of brushed champagne. Sustainable materials made from recycled plastics and paper are used as risers and dropped in fixtures that are both industrial and green.

Viaggio offers custom upholstered items and an extensive library of fabrics that can be utilized in products as diverse as bust forms, custom lamp shades, wall coverings or custom draperies. Forms and mannequins have been updated and created from Three-dimensional design, using the latest 3D scanning and printing methods.

Collaboration between the diverse and dedicated Bernstein Display team helps us deliver some of the industry's best display products and design services. These efforts are consistently recognized by our customers in the form of accolades and long standing relationships, and by the industry, as we were awarded "Most Outstanding Showroom 2019", by Design Retail magazine.

# CORK

Cork continues to be one of the most sustainable materials used in industry. The natural, tactile warmth and beauty of cork is seen like never before with metallic embellishment in textiles, decorative tiles, panels, as well as risers, boxes, and trays in a variety of thicknesses. Keep an eye out for updated versions of cork products throughout the year.

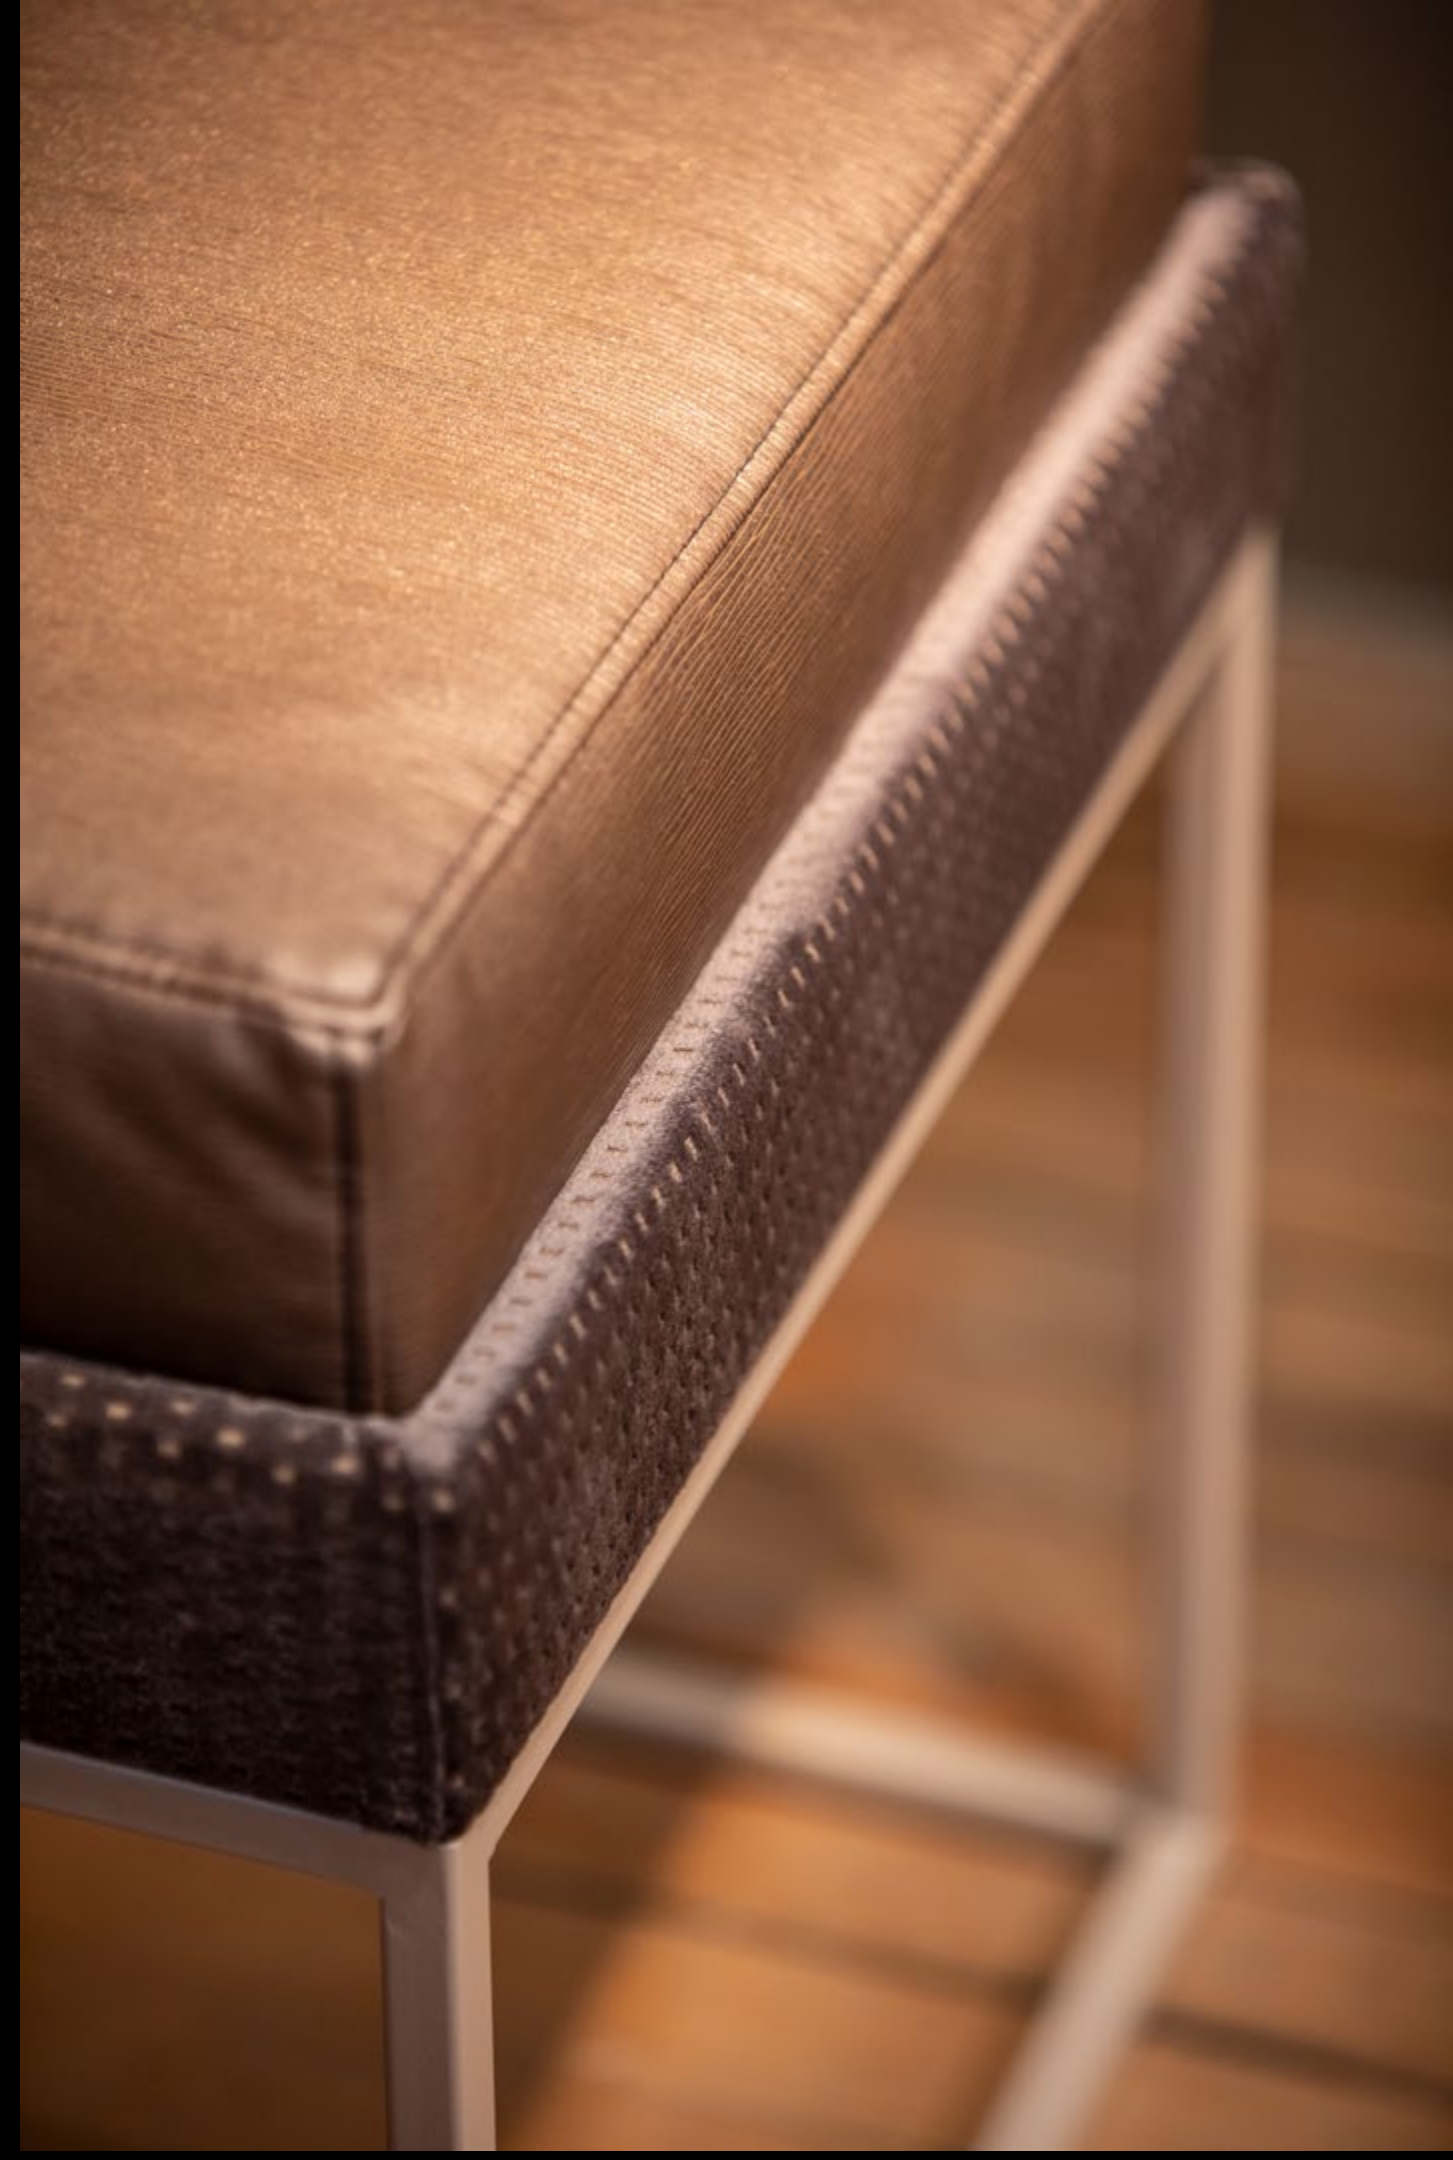

# TEXTILES

Viaggio, a division of Bernstein Display, focuses on a softer approach to the visual environment with a collection of small fixtures, furniture, and drapery. Lush fabrics in velvet, velour, faux fur, and faux leathers cover mannequins, forms, furniture and decorative accessories. What drives each of our product lines, is a vast library of textiles available to help compliment your visual merchandising projects.

# METAL

Metal warms up for 2019 with a different approach to finishing and plating. Industrial meets luxury with new brushed finishes in champagne and gold. Warm metals pair well with wood, cork, and buttery leather for a rich product presentation. A highlight in the showroom is our continued efforts to source and use the newest green materials. Risers are finished with Eco-Stone, made up of 90% paper and Copperstone, another beautiful material made entirely from recycled plastics and metal shavings.

# 3D TECH

Bernstein Display offers creative services using the newest 3D scanning/printing technology and digital rendering programs. We can customize any mannequin, or create an exact replica through the use of digital art. Our state-of-the-art printing process allows seamless translation from prototype to production.
